

Thank You for purchasing your counter tops from Classic Rock Fabrication, LLC

SOLID SURFACE

With a little care, the suggestions listed below will keep your counter tops looking beautiful for years to come.

Hot Objects

- Although solid surface is heat resistant, cookware that is still hot from the stove, oven, microwave or any heating device should not be placed directly on solid surface. Always use trivets or flame resistant mats.

Protecting the Surface

- Do not cut directly on the surface of your countertop, always use a cutting board.
- Do not stand or sit on the countertop.

Cleaning

- For most cases you only need a clean, damp, non-abrasive cotton cloth and a mild detergent or any household cleaner. Do not use anything abrasive or containing Clorox.
- For tougher stains, Soft Scrub (no bleach) and a sponge can be used.
- Gray Scotch Brite can be used inside the sink only.

Chemical Damage

- Avoid acetone (fingernail polish remover, paint thinners, etc.)
