

## Thank You for purchasing your counter tops from Classic Rock Fabrication, LLC

### LAMINATE CARE

*With a little care, the suggestions listed below will keep your counter tops looking beautiful for years to come.*

#### Scratch and Impact Protection

- Do not chop, slice, pound or hammer on any laminate surface.
- Ceramics and abrasive objects can cause scratching, do not slide these types of items across surface.

#### Hot Objects

- Cookware that is still hot from the stove, oven, microwave or any heating device should not be placed directly on laminate surface. Always use trivets or flame resistant mats.

#### Cleaning

- For most cases you only need a clean, damp, non-abrasive cotton cloth and a mild detergent or a household cleaner such as Windex or Simple Green. Avoid anything abrasive or containing Clorox. Abrasives can dull and scratch the surface making it susceptible to staining.
- Do not flood the laminate with any liquid, especially near seams.
- To remove a stain, use full strength Fantastic All Purpose Cleaner, Formula 409, or Pine-Sol. Afterward, blot with a clean, damp, non-abrasive cotton cloth and follow with clean water.

#### Chemical Damage

- Never use cleaners containing acid, alkali or sodium hypochlorite. These cleaners will mar, etch, corrode, or permanently discolor the laminate surface.
- Accidental spills or splatters from these compounds should be wiped off immediately and the area rinsed with water.
